GREASE POLICY:

Patrons are required to follow proper procedures when disposing of Fats, Oils, and Grease in the campground. Fats, Oils, and Grease cannot be poured into the sewage this can lead to damage of your RV if the sewage backs up due to inability to flush. **Proper way to dispose of Fats, Oils, and Grease is in the containers at the bathhouse facility (pictured below)**

The image to the left of the discharge sewage pump is the impact of patrons not abiding by the grease disposal policy outlined in the reservation form. Failure to abide by the policy will eventually result in the main sewage line being blocked rendering the campground with no sewer discharge for the days it would take to clear the line of the blockage.

The image below shows the location of the two grease containers indicated by the red arrows. If you notice the containers are full, please contact someone at the Recreation Central office **278-5789/4124**.

Thank
you for
your

cooperation and understanding.
