### IMPACT AID SURVEY

- Federal Impact Aid is a law that provides a way for the federal government to **reimburse local school districts** for the loss of property and business tax support associated with federally connected students residing on/off base in the district.
- The funding that your child's school receives in Impact Aid **directly impacts his or her education** by providing replacement funding for operating expenses such as materials, equipment, staff, special education programming, and building improvements as part of the general funding of the district.

### What Can I Do As A Parent?

Each year your child receives a **Federal Survey Form** that requests confidential information regarding his/her federal connection (including military and civilian family members). Simply by thoroughly completing and promptly returning this brief survey, you contribute to your child's school funding!

- Incomplete surveys cannot be submitted for Impact Aid; thereby creating a loss of funding for the district.
- Information provided is protected under Privacy Laws.

**Surveys are given out in the  
First Quarter of the school year.**
